

Geologist Outlines Coal Situation In Illustrated Lecture

Fuel Symposium Opened
Last Night in Physics
Building

MINES MISPLACED

Importance Of Coal To
Mankind Stressed By
Dr. Moore

"Canada is remarkably well supplied with coal, but unfortunately none of it is in the right place," stated Dr. E. S. Moore, Professor of Economic Geology at the University of Toronto, last night in the Macdonald Physics Building. This lecture marked the opening of a symposium arranged by McGill with the purpose of placing before the public an authentic account of the coal situation in Canada. Professor McKergow was in the chair.

"The Origin, Physical Character and Distribution of Canadian Coals" was the subject of Dr. Moore's address, at the commencement of which he asserted that the coal problem is one of the greatest, industrially, economically and socially to-day. "Coal and its by-products are the sinews of all great nations," continued the speaker "and so the study of coal is among the greatest factors of modern civilization."

Illustrated by Slides.

After these introductory remarks, Dr. Moore went on with a study of problems in relation to Canadian Coal, with the aid of many extremely interesting lantern slides. By this means the noted geologist explained that all coal originates chiefly from vegetable matter. Of the several theories for the accumulation of vegetable matter in large deposits, he supported the "in situ" theory or the accumulation in large fresh water swamps. In the coalification process, an important role is played by heat and pressure which are the main factors in producing the higher from the lower ranks of coal.

In dealing with the physical character, the speaker stated that the Lignite coal found in Western Canada contains moisture which causes it to break up easily. This makes it poor for transportation purposes. (Continued on Page Four)

Dr. Kiang To Speak To Chinese Society

Meeting To Be Held In
Moyses Hall

Dr. Kiang Kang-hu, Professor of Chinese studies, who has just returned from China, will speak tonight in Moyses Hall at 8:15 p.m. at a special meeting of the Hung Tao Society. He will tell of his recent experiences, and will describe present conditions in that country.

The meeting will be open to the public, and anyone who is interested is urged to go, especially those students who are new to the University. The Society has more than 200 members, 125 of which are Canadians, and 70 Chinese. Anyone desiring to join the Society may do so after this meeting. Membership may be obtained with the endorsement of a member and the sanction of the Membership Committee.

Lectures Arranged

Dr. Kiang Kang-hu will also hold a series of 8 lectures for members and their friends. These lectures will be held in R.V.C. the first Wednesday of each month, and will be entitled the Great Book series.

Each lecture will deal with one great book of the Chinese. Ancient classics such as: Taoism, Confucianism, and Buddhism.

Buses To Kingston

See Harry Grimsdale In
Engineering Building

Harry Grimsdale, the efficiency expert of the Engineering faculty, now comes to the fore with a new angle on Saturday's game re transportation. He states that the round fare to Kingston on the Provincial Transport Co. Buses, including a ticket to the game, amounts to \$7.00. The buses will leave Saturday morning at 7:00 o'clock and will return the same evening.

All those desiring further particulars should see Harry in the Engineering Building as soon as possible.

Noted Scientist Welcomed Home After Long Trip

PROFESSOR FRANCIS E. LLOYD,
F.R.S.C.

Good Turnout At Kingston Is Urged

Special Excursion Trip For
Game Is Provided

REASONABLE CHARGES

Strong Student Support Will
Greatly Help Team's
Chances of Winning

"If we get a big crowd down there to cheer and support the team, we'll have a very good chance to win the game at Queens, this Saturday," said Major Forbes, yesterday, when interviewed at the Athletic Office. He then pointed out the necessity of the team knowing that the college was behind it. This can only be proved by loyal support on a foreign field, and McGill students must turn out in sufficiently large numbers to encourage the players.

Riley Horn's have organized a special train for Kingston, which will leave Saturday morning and be back the same night. The train leaves Bonaventure Station early. The return railway price is \$6.00 and at Queen's, a covered seat may be had for \$1.75, and an ordinary seat for \$1.50. The team will return on the same train in the evening. The tickets may be purchased at Riley Horn's.

Reasonable Rates

This trip will provide an excellent opportunity for the students to see what promises to be the best football tilt of the year, at a reasonable cost. An added attraction is the fact that the team will return on the train Saturday evening with the rest of the rooters. This excursion is a very enticing one and there is no reason why a large crowd will not be at the Queen's Stadium, to urge the team on to victory, next Saturday.

Players' Club Will Present Two Plays

Workshop Department To
Make Debut In November

Final arrangements are now being made for the first presentation of the Workshop Department of the Players' Club which will take place on Tuesday evening, November the third. The casts for the various productions are already in full rehearsal under the direction of the Chairman, Gordon LeClaire, and Hume Cronyn. There will be no admission fee and all students and their friends are cordially invited to attend and encourage the new talent.

The first play, a comedy by the famous American novelist and playwright, Roland Petway, entitled, "Evening Dress Indispensable," has the following cast:

Allice Waybury Jacqueline Sprinkle,
Sheila Barbara Meagher,
George R. Macdougall,
Geoffrey W. Beattie.
The second offering will be the famous tragedy, "The Valiant," with the following players:

Warden Holt E. Haley,
Father Daly W. Hatfield,
James Dyke Gordon LeClaire,
Josephine Paris Margaret Miller,
Dan, a Jailer W. Shelly,
An attendant R. Leatham.

Between these two plays the Potomac Scene from Romeo and Juliet will be performed with Elma Ferrigard portraying the role of Juliet.

Performed Interesting Botanical Research In Munich
With Professor Goerbel

Read Two Papers Before
British Association At
Centenary in London

Prof. Ernest Lloyd, head of the Biological Department has returned after a five months stay in Europe, bringing back stories of many interesting experiences, and much material for his continued research work.

Ireland saw him in Belfast where he was the guest of Dr. Beatty, and Dublin while he visited Professor H. Dixon of Trinity College. The College boasts of a very excellent greenhouse and many extraordinary and rare specimens, which, owing to the great quantity of moisture in the air, flourish vigorously. He bemoaned the dry, cold winters here which are so hard on moisture-loving tropical plants, and remarked that even palms can be grown outside in Dublin.

Obtains New Assistant

Next he made his way into Wales, England, and Scotland, where he visited the Royal Botanical Gardens, which are the care of Wm. Wright Smith, Regis Keeper.

The express purpose of his visit to Edinburgh however, was to interview and engage the services of Mr. White, who is here as his new assistant.

He next visited the south of England, and in Southampton saw Mr. Watlin to whose generous interest McGill owes many collections in the botanical collection. In London he studied the inexhaustible treasures of the Natural History and British Museums, and a few days later left for Germany.

Here Prof. Lloyd did much of his most important work, visiting Munich, Heidelberg, and being entertained by such well-known men as Max Koerner, Ludwig Jost, and Karl Freudenberg. Karl Freudenberg is a companion of his African expedition of three years ago when he went from Capetown to Port Sudan, and is known to McGill by his lectures given here last year.

Spent Six Weeks in Munich

At the invitation of Karl Goerbel, his former professor at Munich, he (Continued on Page Four)

Scarlet Key Seek To Cut Expenses

More Support Needed By
Freshmen Ushers

In view of the deficit suffered last year by the Scarlet Key Society, it was emphasized at a meeting of the Society held last night in the McGill Union that expenses should be reduced to a minimum during the forthcoming year.

The meeting was called to order by the President, A. Hamilton, and discussion took place concerning the reduction to be given to a Chicago Football team that will be stopping off at Montreal on October 22. The members were then urged to turn out in full numbers to usher at the remaining football games. Arrangements for the procuring of felt keys to be put on the Society's sweaters was being made by the executive, the President announced.

The Society deplored the fact that not enough support was being rendered by the freshmen ushers, and urges all who assigned for the work to attend to it without fail until the end of the football season.

Dr. Eve To Lecture On Physical Trends

Object Is To Show Drift Of
Modern Ideas

The Physical Society will hold a lecture in the Main Lecture Theatre, Macdonald Physics Building on Friday, October 23rd, at 5 p.m. Dr. A. S. Eve will speak on "The Trend of Physical Ideas on the Three Centenaries." The centenaries referred to, are the centenaries of Faraday, Maxwell and the British Association, all three of which recently took place in England.

These celebrations were attended by the leading physicists from all parts of the world. The object of the address is to indicate the drift of modern ideas on physics which are now at a very interesting state of change and development.

Winners of Four Arts Scholarships Are Announced

The results of scholarships, based on the Matriculation entrance examinations, were announced today by Dean Ira MacKay, of the Faculty of Arts. The Robert Bruce Entrance Scholarship, valued at \$100, was awarded to Jacques Royer of the Montreal High School, whilst the Robert Bruce Bursary of \$100 was won by Malcolm Hugh Blair-McGuffie of Ampleforth College, York, England.

The Hon. Robert Jones Scholarship, tenable for 4 years and valued at \$125 a year, was awarded to Marian Jean Werner of Strathcona Academy, Outremont. The last of the group, an additional entrance scholarship of \$100 was granted to Mary Kathleen Bough of Gault Institute, Valleyfield.

Debating Union To Start Activities

Open Program With Mock
Parliament Tomorrow

STUDENTS WELCOME

University of Montreal Debaters Participate — Will Use Own Language

Tomorrow evening at 8:15 the McGill Debating Union will hold its first meeting of the year in the form of a Mock Parliament in the Union Ballroom. The subject to come under discussion is: Resolved that present world conditions justify immediate and complete disarmament. Each team is composed of three members, two being McGill men and the third a representative from the University of Montreal.

This is the first time in many years that the University of Montreal has joined with the McGill Debating Union, and the audience is promised interesting material and good form from the U. of M. debaters. At McGill, every male student, who pays his \$17.00 fee, automatically becomes a member of the McGill Debating Union. Not so at the U. of M. To join their debating society, each would-be member must first undergo a "speaking competition"—and the pass marks are high. Thus we can be assured of men well versed in debating.

Debaters of Note

Ken Baker, Vice-President of the Debating Union, will be one of the affirmative speakers. He was former Inter University Debate representative and will fully come up to, and we hope surpass his reputation of former times.

Harold Lande, a well-known scholarship man, and a former member (Continued on Page Four)

S.V.M. Convention Will Be At Buffalo

Hugh MacMillan Will Deliver
Address This Evening

The eleventh Quadrennial Convention of the Student Volunteer Movement, which will be held from December 30 to January 3 in Buffalo, N. Y., will be the occasion of the gathering together of about four thousand students from the United States and Canada.

McGill will be represented in the Canadian delegation by no less than twenty-five students. The theme of the conference is the living Christ in the world of today.

Hugh MacMillan, recently returned from Formosa, at present the Organizing Secretary for the Canadian delegation, will be at McGill today and tomorrow for the purpose of setting up a committee to arrange for the setting and financing of the McGill group. This group will be chosen from among those students who are actively interested in modern missionary problems. The joint S.V.M. and S.C.M. Mission Study Group will conduct a preparatory course for all who are interested in the theme and who would like to attend the conference.

Those who are interested will have the opportunity to meet and hear Mr. MacMillan at a meeting in Strathcona Hall at eight o'clock this evening.

R.V.C. Undergrad Executive

A short meeting of the R.V.C. Undergraduate Executive will be held in the Common Room of the Arts Building today, at one o'clock. This includes, Marjorie Lynch, Alice Johnson, Sally Hays, Norma Roy,

Phonetics Will Be Introduced In New Course At McGill

Professor W. L. Graff To
Give Series Of Fifteen
Lectures

BEGINNING TODAY

English, French and German
Systems of Pronunciation
To Be Studied

The Extension Department of McGill is this winter introducing a course in phonetics, under the direction of Associate Professor W. L. Graff. The course, which costs \$9, will consist of approximately fifteen lectures, to be held every Wednesday beginning October 21st, between 5 and 6 P.M.

In these lectures pronunciation is studied in its physiological, acoustic and psychological aspects, with a view to obtaining an insight into the general process of sound-production and sound-reception in speech. English, French and German are compared as to their respective bases of articulation, their sound-systems and sound-clusters, their laws of sound-connection, of syllabification, and of the distribution of stress and pitch.

Speech Irregularities Shown
Emphasis is laid upon the diagnosis of foreign speech-idiosyncrasies, and methods are discussed for their elimination. The lectures are of special interest to all teachers and students of language and speech. No previous phonetic knowledge is required.

In learning a foreign language the greatest difficulties come from the deep-rooted speech-habits developed in the acquisition of the mother-tongue. These habits affect all the features of language, such as sentence-structure, idiomatic phraseology, word-formation, meanings and sounds. Each of these features presents a considerable complexity and requires a concentrated study with a method of its own. Unfortunately, while the syntactical, morphological and lexical aspects are given a great deal of attention, pronunciation is often only casually taught, as if it were quite naturally acquired by mere imitation.

Study of Phonetics is Essential
Today phonetics is a solidly founded branch of language study which (Continued on Page Four)

Snapshots Of Campus Revelries Wanted

Annual Will Award Prizes
For College Life Pictures

The Editorial Board of "Old McGill, 1932," is anxious to obtain photos and snapshots of university and college activities taking place during the present session. To this end a similar competition to that held last year will be organized.

Several cash prizes will be awarded to those submitting the best photos of events pertaining to college life and campus antics. Have your camera with you at all times in order to record the various scenes of revelry, jollification and what not. Stage your own groups if necessary or get the unwary or frame your friends. Sneak into the Players Club and Workshop rehearsals or the Junior Prom and Faculty Society dances.

Start clicking immediately as several weeks of the session have passed. There is something doing everyday which ought to be snapped and perpetuated in the Annual. If there is nothing that suits your fancy get out and stage it. Act now as the prizes are substantial and the fame everlasting. All suitable material will be reproduced in the publication.

Address all inquiries and material submitted to the McGill Annual Board, McGill Union.

Addresses Wanted For Students' Directory

Students who have not yet included their correct addresses or phone numbers on their registration cards are asked to make corrections and additions at Miss Hensley's office in the McGill Union.

Class executives who are aiding in the completion of lists are requested to make returns with all possible speed.

An early and accurate edition of the Students' Directory depends on the co-operation of the student body.

Newfoundland Club Will Hear Lecture by Prof. McCullagh

Tonight at 8 o'clock, the first meeting of the Newfoundland Club will be held at Strathcona Hall. Professor McCullagh M.A. will give an illustrated lecture on "The Cathedrals of France, Their Sculpture and Symbolism." Dr. W. H. Hatcher, Honorary President, will be in attendance and will also speak briefly.

The club has been in existence some fifteen years and has, during that time, been the only means of bringing together students from Britain's oldest colony. Newcomers are specially invited to attend and will receive a hearty welcome should they decide to do so.

Refreshments will be served and a pleasant evening is promised for all.

Lecture Series In Verdun Organized

Col. Bovey of McGill Will Be
First Speaker

ADDRESS IS TONIGHT

Series Is Initial Step In
Adult Education
Work

Toc H of Montreal, and the Verdun, Quebec, No. 4, Branch of the Canadian Legion, have taken the initiative in organizing a series of lectures with a view to the advancement of adult education, here in the city. These lectures, which will as well be illustrated, are to be given in Verdun through the cooperation of extra mural relations at McGill University.

The initial lecture of the series will be given this evening in the Great War Veterans' Memorial Hall in Verdun, when Col. Bovey, of McGill University will speak on "This Canada."

Six Lectures Arranged.
The present series of lectures will be of six in number and it has been arranged as the preliminary step towards the formation of a number of courses and probably an adult education association in the rapidly growing district of Verdun. The object is to place educational courses within the grasp of people who could not otherwise enjoy such facilities.

The first series will be a general course. Following the lecture by Col. Bovey tomorrow night, there will be an address by R. F. Legget, of Toc H, on October 27, the subject being "Water Power in Canada." The speakers and subjects of the other four lectures will be announced later.

The Verdun end of the work is being undertaken by the Verdun, Quebec, No. 4, Branch of the Canadian Legion, of which A. D. Cameron is president.

Bandsmen Prepare For Gala Tag Day

Kingston Trip Abandoned In
Favour Of Toronto

The McGill Band will not honour Kingston with its presence at the Queens-McGill game this Saturday. Needless to say, this is rather a disappointment to some. However, a special bus is being run on November seventh, to Toronto, in order that the band may announce the advent of its Alma Mater's famous team for the Varsity-McGill game. Also, some of the members are kindly furnishing their cars.

The weekly practice was held yesterday afternoon, when a strenuous hour's work was done. This Monday is to be a momentous day in the history of the band. It is hoped that the students of McGill who confess to being Scotch, will not be conspicuous by their absence around the campus. For it is to be Tag Day! Fifty dollars are to be raised from somewhere, somehow in the not distant future. Even colleges bands must be financed and no one would like to think that the McGill Band is suffering through lack of student support.

So come on, everybody, dig down deep this Monday and make it a gala day for the band!

Glee Club

There will be a meeting of the Glee Club in the Conservatorium of Music tonight at 7:30. New members are invited to turn out along with the others.

Students Society Will Meet Today In Union Ballroom

Changes In Constitution
Affecting Women Fees
To Be Proposed

CHANGES SUGGESTED

Number Of Representatives
From Athletic Board
To Be Discussed

The first meeting of the Student's Society will be held in the Union Ballroom this afternoon at 5 o'clock. Several amendments will be proposed, one of which concerns a change in the constitution affecting the fees of the female students. The other two proposals concern amendments in Article 7, Part 4, which effects the number of male representatives of the Athletic Board from the Students' Society.

All undergraduates, whether male or female, who pay the university fee, are members of the Students' Society, and as such are invited to attend and vote upon the proposed amendments. In view of the fact that this year is the first that female students have been admitted to membership of the Students' Society, a special invitation is tendered to them to attend this meeting.

Proposed Amendments.
Official notice of these proposed amendments is cited below as sent into the Daily Office.

Notice of motion is herewith given that the meeting of the Students' Society held on October 21st, 1931, in the McGill Union, be, the undersigned, will move that the Constitution of the Students' Society will be amended as follows:—

Article 3 (1) B which now reads:—
Each female member of the Students' Society shall be required to pay an annual fee of \$10.00. This sum is to be collected by the Bursar with the regular tuition fees and is to be divided as follows:—
Athletic Board \$5.00
M. W. S. A. A. \$1.00
McGill Daily \$1.00
Students' Council \$1.00
Undergraduates' Society \$1.00
shall be amended to read:—each female member of the Students' Society shall be required to pay an (Continued on Page Four)

Glee Club Offers Attractive Program

Freshmen Especially Invited
To Attend Meeting

Again affording an opportunity for newcomers to attend, the McGill Glee Club is holding another meeting tonight at 7:30 in the Conservatorium of Music. Any new members will be welcomed, particularly freshmen, who need not be deterred by lack of experience, as the music is not at all difficult.

The Club was started last year under the leadership of Mr. Orlan de Ville, and accomplished a great deal of work, but of course, it can be greatly improved upon, which is a large, regular attendance of enthusiastic men would help.

Three main attractions are offered, namely, the opportunity to receive good training in singing, which will appeal to those who have not had very much experience; a program consisting of broadcasting performances at college affairs and perhaps a trip to Toronto; and, last but not least, a great deal of fun. McGill in this way would greatly add to its fame, as Yale University and many other colleges have already done, through their Glee Clubs.

Dr. Day Will Speak To Telephone Employees

The second of the series of lectures given by Dr. J. P. Day, Associate Professor of Economics at McGill, will be given in the Bell Telephone Building, Beaver Hall Hill, Wednesday, at 5:15 p.m.

Electrical Club To Hear Dr. L. C. Douglas

The weekly luncheon of the Electrical Club will be held at the Queen's Hotel at 12:45 p.m. Dr. Lloyd C. Douglas will be the speaker and his subject will be "Silk and Amber." Dr. J. Soper the president is to be chairman.

Montreal, Wednesday, October 21, 1931.

The Political Season Opens

The first meeting of the Students' Society for this session will be held this afternoon in the Union ballroom. With this, the meeting of the paramount student body at this University, members of the Society, that is, all men and women undergraduates who have paid the universal fee, will have their first opportunity to voice their opinions on matters concerning undergraduate affairs.

Newcomers are reminded that Student Society meetings are open to all those within the above classification. There is no Freshman disenfranchisement at McGill. They are urged to come and learn at first hand just how the affairs of the Campus are managed.

Because this meeting is the first one to be held since the women were given equal rights with the men last Spring, special significance must be attached to it. The presence of female members of the University will mark the consummation of many years endeavour and propaganda, and the accomplishment of what at times seemed to be a hopeless cause.

The number of women in attendance will be some measure of their response to the new order of things. That, and the part which they take in the proceedings, will give some indication of whether they wanted amalgamation solely as an acknowledgement of the right to equal status with the men or whether they desired it in order to have a voice in matters which concern them. In short, their presence and interest will show that, having achieved their end, they are willing to partake in the responsibilities attendant upon it. Those who have laboured in the past for the admission of women into the society will be disappointed if those women show no further interest.

Campus politics is the ready butt of cynics. Perhaps student affairs are not the most important things in the world. Admittedly at times they are trivial, futile and ridiculous. But all politics are at times trivial, futile and ridiculous. Futilities, trivialities and absurdities seem to accompany any form of democracy. Despite all the shortcomings of student government here or anywhere else there are few who would welcome back complete authority over matters concerning undergraduate activities by the University authorities.

The best way to avoid unwise moves on the part of the Students' Society is by means of a large and representative turnout at its meetings. The present quorum of 50 is so absurdly small if we consider the size of the student body that "packing" the meeting would be quite easy should any organized group wish to do so. There are many societies and sectional groups on the Campus with a larger membership than the number required by the society to transact business.

The small quorum is a reflection on the interest shown in the past by those who are most concerned by the Students' Society's decisions, that is, the whole student body. Let us hope that this session the old indifference will be gone.

Mock Parliament

Tomorrow evening the McGill Debating Union Society will inaugurate its 1931-32 season locally with the holding of a Mock Parliament in the Union Ballroom. Last year a number of Mock Parliaments were held and proved very popular amongst the students, and a large turnout of undergraduates is expected tomorrow night. The Debating Union is one of the oldest societies at the University and last year celebrated its fifty first anniversary with a most successful season, which was terminated by McGill winning the intercollegiate debating crown as well as being returned victorious in a number of important debates with students from foreign universities. The society has already started its present session most auspiciously when a team from McGill visited Porto Rico and defeated the Porto Rico University team that visited us last year.

A feature of the mock parliament tomorrow night is that students from the University of Montreal will take part. This is a most important step towards more complete cooperation between Montreal's two Universities.

THE BARMAID TAVERN

McGill College and St. Catherine

Beautiful, yeah, but dumb.....Nope, I says to him, I'm not that kind of a girl.....Green with stripes, too cute for words.....And how should I know. She looked o.k. from the outside.....Well, Goldstein, how's business?.....Rotten.....Listen kid let's have a Mayfruit.....Avez-vous un telephone mademoiselle?.....Non, mais j'ai.....No money in that game, no sir.....Gee, whizz, hot stuff, eh.....Yep. Body by Fisher.....Oh, I just adore Janet Gaynor.....Hullooh Jim! Where've you been hiding all these years.....Well, well, well.....I was a damned fool to have on margin but you know how it is.....We got three nine o'clocks a week, and talk about a reading list.....She's out for cash but believe me with them hips.....No it doesn't. The median nerve only supplies the flexors.....However, you're bound to admit the existence of some Creative Intelligence, which.....Eighteen bucks a week and the wife in the hospital.....They're the loveliest step-ins for sale at Eaton's for 69 cents.....Did you see the 440. Some stepper, Phil, eh.....Can you imagine calling me an old sucker. Can you.....and Gentlemen, all 6 articles for one quarter, twenty five cents. Thank you. Anyone else.....They don't split on you, either.....Not a decent book of poetry the whole year. I think Mencken is right.....The Marx brothers are lousy.....Personally, you know, I am not prejudiced. In fact some of my best friends are Jews.....And he's supposed to kiss me in the second act.....I says to him I says, You better lay off that dame.....

Price, Waterhouse and Hume

It had been reported to me on reliable evidence that one of the subjects handed to the students in Transportation at the dear old college of Yale recently was the "Philosophy of Railroad Accounting."

What a splendid opportunity for the earnest accountant. Think of the chance it gives him of renewing his acquaintance with the old and reliable firm of chartered accountants: Plato, Descartes, Leibnitz, Kant, Schopenhauer, and Bergson. If any budding C.P.A. would like to follow in the path of his American brethren, I would like to point out the manner in which this subject could be approached. Consider first the place of accounting in the general scheme of things. Relate it to the Cosmic Consciousness and the Life Beyond the Grave. Here one could very conveniently interpolate a chapter on the accounting practices of the Heavenly Railroads and its relation to the state of the soul.

Having done that, the philosophizing addition expert might proceed to ensnare the elusive elan vital of accounting in general and railroad accounting in particular. Then should come a chapter on "Time-Space and Railroad Accounting" followed by one on "Holism and the Railroads" and one dealing with the influence of ethics on Accounting and vice versa.

After having summed up the philosophical implications of the subject it might also be in place to consider the present depression in the light of Railroad Accounting and its importance in the question of Disarmament.

Ejaculations!

The cosmos is a gigantic fly-wheel making two thousand revolutions a minute. Man is a fly taking a dizzy ride on it. Religion is the theory that the wheel was set to spinning in order to give him a ride.

H. L. Mencken.

Football is a useful and charming exercise. It is a leather ball about as big as one's head, filled with wind. This is kicked about from one to 'tother in the streets, by him that can get at it, and that is all the art of it.

Misson (18th century).

Justice Credulous: "I won't die, Bridget—I don't like death."

Bridget: "Pshaw! there is nothing in it; a moment and it's over."

Justice Credulous: "Aye but it leaves a numbness behind that lasts a plaguy long time."

R. B. Sheridan.

Scene: The Odeon Theatre, Paris. Occasion: Sarah Bernhardt in "Camille". Gabriele D'Annunzio cannot refrain from voicing his admiration of the Divine Sarah: "Belle, Magnifique, D'Annunzienne."

Natur never makes enny blunders. When she makes a phool she means it.

Josh Billings.

THE KINEMA

By Kluge

SOPHISTICATED Collegians may talk of the drama and how great their understanding of it is, in order to impress the multitude but they go to the movies for entertainment. There were times when the downtown shows realised this, and at least one of them gave a McGill night; but following incursions by enthusiastic students celebrating their collective athletic prowess, the afflicted managers were tempted to what revenge they could take: they wiped out all privileges, including passes to the review editors of this publication. This year of grace marks something of a reversion, and so it is that the "Flickers" and "Noises" will once again receive attention in these columns.

Who dares say that study does not play a very prominent part in the lives of the screen stars of Hollywood? Listen to this—Rumor has it that the beautiful blonde film actress, Jeannette MacDonald prepared for her many love scenes with a library of some 3,000 volumes on the subject of that gentle passion. That at least must have given the lady a rather thorough insight into the subject.

We have been told that Robert Montgomery is another hard worker. There is one thing about him that certainly puzzles Hollywood. Where does the man get all his enthusiasm and pep? He is on the go all the time, either playing golf, tennis or polo. The only time that he seems to be quiet is when he is reading or writing in the library of his

rambling Spanish home. Although Bob is one of the leading stars of his profession and certainly a good box office attraction, he doesn't intend to be just an actor all his life. He is a great reader and thinker. He hopes, sometime in the near future, to write stories for his own pictures.

Howard Hughes, well known producer of "Hell's Angels" and "The Front Page," perhaps the most eligible bachelor in Hollywood, on account of his youth, good looks and wealth, has been reported engaged, to at least five prominent movie actresses, among whom are Lillian Bond, Billie Dove, and Jean Harlowe.—What is this strange power?

We have often witnessed the gentle heroine lose a great deal of her meekness and give the villain a much-deserved smack on his swarthy jowl, but rarely have we seen the villain strike the heroine.—What, this one is not believed? Well, when you see "Night Nurse," just watch Clarke Gable administer the perfect blow to Barbara Stanwyck's chin.—And he is reported to be the hit of the season.

By the way, speaking of Barbara Stanwyck, her next picture is entitled "Safe In Hell."

Constance Bennett is the only member of that famous family who has never appeared professionally on the stage. Richard Bennett, her father, is well-known to the theatre-going audience, while her mother, the former Adrienne Morrison, used to appear regularly on Broadway. Both her sisters Joan and Barbara have appeared in stage productions.

This ultra-sophisticated lady of the screen has just returned from her European vacation and plans are being made for her next production "Dangerous To Love."

Every little while, Hollywood captures one of the legitimate stage's real artists. Perhaps one of the latest, is little Sylvia Sydney who was chosen to take the place of Clara Bow in "City Streets." Having been given this chance, Miss Sydney soon proved her ability and worth before the camera. Soon after this picture, she was starred with Philip Holmes and Norman Foster in "Confessions of a Co-Ed." Then came the opportunity of "Street Scene," the compelling screen drama written by Elmer Rice and directed by King Vidor, in which Miss Sydney's performance was excellent. Following this, was the part of the factory girl in the screen version of Theodore Dreiser's dramatic novel, "An American Tragedy." May this youthful actress receive more parts like these, for her talent merits them.

A note on hand states that Marlene Dietrich is now painting her toe-nails black; that Ina Claire's pet aversion is long skirts on the street, that Louise Fazenda's is parking stations; that James Gleason's is rhubarb; that Lew Cody's is spotted shoes.

Billie Dove is now engaged upon making "The Age of Love." At last this actress has been given a really good part. Billie uses her great beauty to help make this role dramatic.

We wonder if your birthday is this week.—Sunday 18, 1886 Karl Dane was born. Tuesday 20, Marian Nixon, Evelyn Brent, Bela Lugosi, Charlie Chase celebrate birthdays.

Thursday 22, 1905 Constance Bennett was born. 1920 Mitzel Green was born.

Friday 23, 1899 Lilyan Tashman was born. 1908 Sally O'Neil was born.

Saturday 24, 1897 Gilda Gray was born.

Greta Garbo's latest picture, "Susan Lennox, Her Fall and Rise," will soon be followed by "Mata Hari," story of the famous spy. Garbo leads her profession, no other star even challenges her position.

We must repeat this one.—Connie Bennett nearly caused a riot in New York just a short while ago, when she attended a performance of the Ziegfeld Follies. The glorified ones were so busy looking at her that they nearly missed cues, forgot lines etc.—This, kept pounding through their heads, "What has she got that I haven't got?" — Merely \$30,000 is the week reply.

When news begins to lag or if one is otherwise stuck, the weather is always a safe topic for conversation. Let us try it.—California's sunshine is well noted, but do the stars love it?

Marlene Dietrich, for example, dislikes the sunlight intensely. She says, "That sun, it seems to shine all the time, it seems to dry up my blood. I wish it would rain."

Garbo too, prefers the rain, as she loves to take long walks in the rain. Evelyn Brent likes fog.

Lilyan Tashman, Ann Harding, Alice White, Joan Crawford all favor sunshine. In fact any day that interferes with Colman's tennis, is certainly but "all wet."

CO-EDUCATION, LIQUOR, AND CARS

Dr. Clarence Little, former president of the University of Michigan finds the primary evils of our system of education to be co-education, liquor, and automobiles.

The educator does not assume the attitude of a crusader against students weakened by these elements of our modern schooling. He advocates instead that the students of today be shown "something of the charm and mystery and wonder of life" before they are expected to be free from these "emotional transitions."

The removal of these evils—co-education, motor vehicles, and intoxicating drinks—would involve too much policing. Reactionary feelings would disrupt the college and university system of America and these evils might receive more emphasis than before.

Student drinking is over-exaggerated; a comparatively small number of students have merely created an alcoholic atmosphere. Co-education is accepted philosophically, and though the average man student depreciates the feminine influence and intrusion on himself and his domain, he is not so much affected by it as his elders and certain agitators lead us to believe. The automobile is taboo at many universities, not so much because it is a conveyance by which the student escapes the moral restrictions imposed by institutions, but because it creates a traffic problem on the narrow and congested streets of university towns.

—Daily Illini.

Growth Of College Library Is Traced

Number Of Books On Campus Close To Half Million

(From The Graduate Issue)

In 1855, with the exception of a few books belonging to the medical faculty, there was no McGill University Library. In that year a beginning was made by the purchase of a small number of books chiefly on English history and literature. In 1860, when McGill College moved to temporary lodgings over the old High School on Dorchester street, now the Fraser Library, it carried with it some 1,500 volumes. In 1862, William Molson provided accommodation for 20,000 volumes, but McGill had only 2,000. By 1870, these had grown to 10,000; by 1882, to 20,000. In 1893, when the present library was opened through the generosity of Peter Redpath, the number had increased to 35,000. Under Mr. Gould as librarian, the resources of the library grew until in 1900 an extension to the book-stack was required.

After the appointment of the present librarian, G. R. Lomer, an addition containing stack and space for reading rooms and exhibits was added in 1922, and today, in 1931, the total number of books in all departments of the university library is close on half a million.

Corresponding to the increase in books, there has been an even more striking increase in the number of readers, and in the use which they have made of the books. The circulation during the past year was 95,336, and the combined reading rooms of the Campus served 104,529 students and staff.

The university has had the good fortune to be the recipient of many gifts of rare and useful books and, what is even more welcome, of funds for the purchase both of new books and of volumes needed to fill in the gaps. Such factors have been very numerous, and among them special mention should be made of Dr. and Miss McLennan, Mr. and Mrs. R. R. Blacker, Dr. Casey A. Wood, Lady Roddick, A. F. Baillie, and the Carnegie Corporation. The provision of library funds is becoming on this continent more and more popular as a university donation, and the name of the donor is customarily attached to a building, a fund, or a book-plate.

For the Graduates' Reunion, on the occasion of the 110th anniversary of the founding of the university, the various libraries in McGill have arranged special exhibits of interest to the visitors. The medical library, and the Bibliotheca Oseriana are showing books and manuscripts of historical interest, and a series of rare anatomical plates. The East Chinese Research Library has on view a unique collection of links, early Buddhist Sutras, and manuscripts and writing implements from Manchuria and China. The Redpath Library has arranged a special exhibit of books by graduates and members of the staff, and of the university publications and the library school, as well as of a fine series of reproductions of early French woodcuts; and the newly rearranged Museum of the Book in which may be seen fine examples of illuminated manuscripts, incunabula, binding, and modern printing. Of special interest are a copy of Shakespeare's Richard II of which only one other copy is in existence, and Locke's Essay and Newton's Optics, both of them the author's own copies with annotations for their own underwriting.

The library is open daily until 9.30 and, on Saturday, until 5.00, and a cordial invitation is extended to all graduates and friends of the library to visit it and see its exhibits during the present reunion.

An old darkey was sent to the hospital, and one of the nurses put a thermometer in his mouth to take his temperature. Presently when the doctor made his rounds, he said: "Well, Mose, have you had any nourishment?"

Mose: "Well, a lady don't gimme a piece of glass to suck, boss, but I's still powerful hungry."

Students' Interest In Queen's Battle Becomes Apparent

Special Train To Carry Fans
To Kingston

TICKETS AT HERN'S

JUDGING by the early ticket sale at Riley Hern's well-known sporting goods store there will be about 200 McGill students in Kingston on Saturday afternoon cheering on the redmen in what may prove to be the crucial game of this year's intercollegiate race. Mr. Hern has made arrangements with the Canadian National Railway to run a special to Kingston on Saturday morning, with a return train at night. The whole fare costing only six dollars. Mr. Hern has also arranged for a block of seats in the Richardson Stadium, scene of many thrilling McGill-Queen's games, and is now selling the coveted places fast for their nominal value, \$1.50 and \$1.75.

Not only will there be a great band of McGill students at the game, but also many alumni and city enthusiasts who are filling up the special coaches in order to cheer Coach Shughnessy's team on to an all important victory. If McGill can win this game students would do well to start practicing week in preparation for the contest. "We're Champions Again."

Impressed Last Night.

The squad are hard at work this last night they had a scrimmage with the Freshmen, and looked more impressive than they have in any practice to date. The win over Varsity has given them confidence, and also the assurance that this year they have everyone pulling for them. They know that they have the coach, the plays, and the ability to place them right on top of the intercollegiate heap, and they mean to get there. It is also very noticeable this year that there is a complete lack of criticism of the methods used in training and of the players themselves.

It is this spirit of team-work and determination that makes prospects so bright for a football title coming here this fall.

SPORT NOTICES

JUNIOR AND INTERMEDIATE FOOTBALL

Will the following juniors be at the field-house at 1 p.m. sharp:

Cristie, Lyons, McGregor, Nancekiville, T. Nancekiville, A. Millen, Tucker, Gordon, Riddell, Markham, Thompson, Clark, L.D., Clark, A. Findley, Nadeau, Conklin, Bishop, Newton, Clakton, Gilwood, Percy, Nelson, MacLennan.

And the following at 2:30 p.m. sharp:

Byers, Craig, Black, Stovel, Sangster, Patton, Greenblatt, Blundell, Dodd, Law, Montgomery, Henderson, Gurd, McRobie, Kenny, Carley, Puddington, Clift.

INTERMEDIATE TRACK

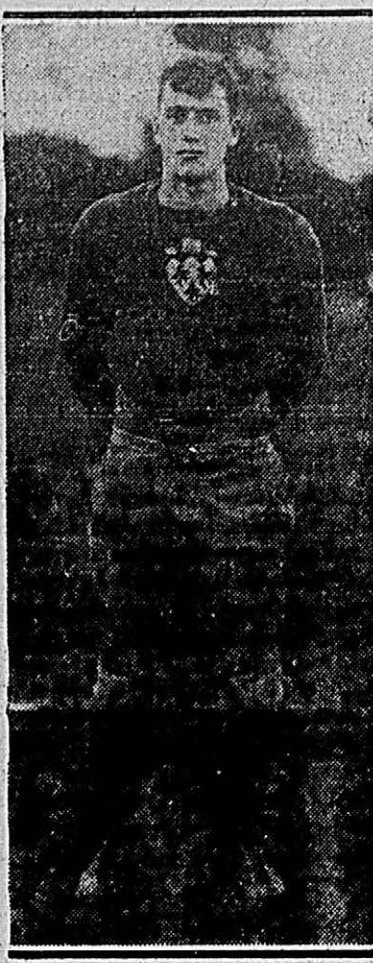

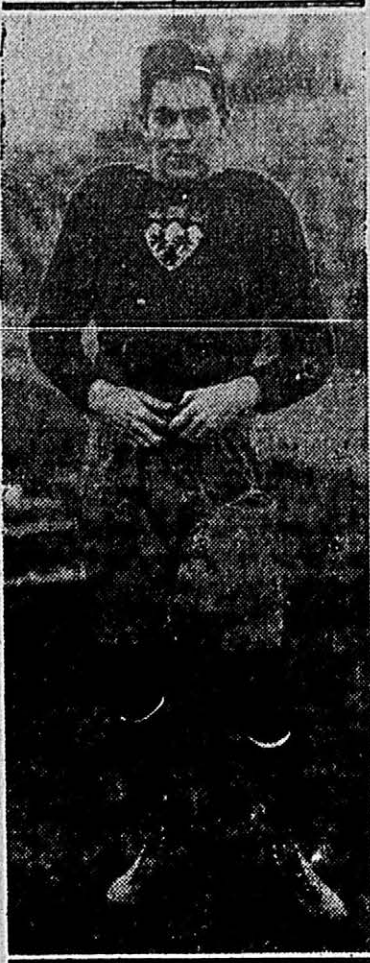

The following please turn out to train for the intermediate track-meet with R.M.C. on Friday, October the twenty-third. Any others interested are asked to come out:

Lilley, King Edwards, Lyons, Ball, Nobbs, Whitcomb, Rodger, Lochead, Billingsley, Lamb, Smith Lusher, McGibbon, McMartin, Sprenger, Freeman, McKergow, Joedikke, Sangster, Evelyn, Dolymple, Standish.

TRACK

Track men who have completed training are asked to turn in their

Two Fine Tacklers

HAMMOND

GRIFFITHS

McGill pins a great deal of faith on these two footballers. Hammond is especially noted as a fast half-line performer, but he showed last Saturday that he can also tackle. Griffiths is playing his first season in the senior intercollegiate, and has certainly made an auspicious debut at his outside wing position.

SOCCER GOSSIP

By Hat Trick

Engineers beat Theology yesterday in the second game of the interfaculty series by a penalty goal. It was a most unsatisfactory way of finishing up the contest and the plumbers didn't feel much better about it than the Theologues.

Neither team played championship football but both played hard and in the words of the society editor "a good time was had by all." On the whole however the lads from the Engineering building had the edge on the Theologues and missed several goals by close margins.

The penalty goal came toward the end of the second half with the teams tied nothing all and proved the only counter of the afternoon. Both teams came very near to scoring on several occasions but missed in the crucial moment.

Gamble and Winn on the Plumbers forward line put up a good showing and having got one game under their belts should prove to be dangerous men in the future. Belloc at centre half also put up a fine performance. No men were outstanding for the Theologues but that team as a whole combined better than their opponents.

Suits and equipment immediately. Lockers must be vacated for the use of the boxers. Money will be refunded on lockers.

Esther: "Now, how did you happen to meet with this accident?"
Lou: "It wasn't an accident—a dog bit me!"

Esther: "Well, don't you call that an accident?"
Lou: "Of course not; he did it on purpose."

Intermediate Are Ready For Cadets

Second-string Trackmen
Working Hard For Meet

PRACTICE TODAY

NOW that McGill has the Senior track crown tucked away for yet another year, members of the cinder brigade are out to win the Intermediate title from their traditional rivals, Queens University. The annual meet is being held this year at McGill, which should prove a big factor in deciding the winner.

In the sprints, McGill is banking on King Edwards, brother of the redoubtable Philip; Nobbs, Lilley, and Standish. The above-named, as well as Lamb, Ball, and Lyons, will probably be McGill's representatives in the relay. In the middle-distance events, Lyons, Ball, Rodger, and Nobbs are expected to make their places on the team. The hurdles—both high and low—are well contested, with Lusher, Lamb, Evelyn, and Smith sailing over in good time. Lusher, Evelyn, and Smith will also contend in the high jump, where Lusher is slightly favoured.

In the field events, McMartin is having it out with Freedman at the discus, and with Sprenger at the shot. The javelin is being heaved through the atmosphere by McKergow and Sangster, while McGibbon will do the pole-vaulting. In the broad jump, Edwards, Lamb, and Joedikke will contend.

Jaywalker—So many people are struck by autos while alighting from street-cars.

Street Car Official—Yes, but those people have payed their fares. It's this running over people who are waiting to get on that makes me mad.

The overproduction of wheat seems to worry the country more than the overproduction of wild oats.

Many Water Polo Players Out For Initial Practices

Newcomers Vie For
Positions On
Squad

OLD HANDS RETURN

COACH Harold Fiske was in a jubilant mood at Monday's water polo practice. The mentor's heart was gladdened by the largest turnout of aspirants that has encouraged a McGill polo coach in many years. There was an actual turnout of thirty-one men, and every man seemed to be enthusiastic in his desire to play the water sport, although they were not all highly skilled performers. A little practice, however, will go a long way to remove any crudities, and it may well be that some of the rawest newcomers to the squad may get the call in the junior league opener on Thursday.

As there are only seven men on a water-polo team and substitution is forbidden, it is obvious that all the candidates cannot get their baptism of fire in actual league competition in the first one or two games. There are, however, ten games on the senior schedule and twelve on the junior, and therefore the coach will have ample opportunity to give every man a thorough try-out in the stress of actual play.

Early Start

Unfortunately, the league is getting away to an unusually early start this year and the shortness of the period of preparation militates against the developing of expert players from raw material in time for the opening games, but as the season goes on we may expect great improvement in the quality of the play.

At the close of Monday's practice, Coach Fiske issued a further appeal to any other polo aspirants to report at once to the Mountain Street pool. "We know of several old players who are at the college this year who have not yet turned out," said the coach. "Those that we know we can approach personally but there must be many others that we do not know and to whom we cannot give a personal invitation."

Coach Pleased

The coach expressed himself as being greatly pleased by the large turnout but hoped that the large number of aspirants out already would not deter any other newcomers from coming down to the tank. No matter how many men turn out, there is always room for a good man, and there are certainly many men in college who are potentially as good players as many of those in the squad at present. There will be another practice at the Knights of Columbus' pool on Wednesday afternoon at 5:30.

Several of last year's teams were at the tank on Monday. Among these were Bourne, Matthews, Davis, Stein, Mercereau and Payton. Mel Dolg, Doug Cross, Bob Shaw and Phil French have not yet come down. Any news of their whereabouts would be appreciated by the coach and Captain Wayland.

Red & White Revue Notes

EXECUTIVE

There will be no general meeting of the Executive this week. The following, however, are asked to meet the Producer in the Revue Office at 5:00 P.M. today: Miss Stanley, and Messrs. Gales, Payton, and Peterson. These are asked to come sharp on time, as the meeting will last only a short while, so that members may attend the Annual Meeting of the Students' Society.

Law Vs Commerce

Law meet Commerce this afternoon at four o'clock in a regular interfaculty rugby fixture.

Soccermen Meet All-Stars Tonight

Annual Fixture To Take
Place Under Lights

HARKNESS RETURNS

THE Red Soccer team play their last game before the intercollegiate series tonight when they clash with an all-star aggregation from the city junior league. This game has become an annual feature in the last few seasons but this will be the first time it has taken place under the arcs.

The All-stars usually field a pretty strong outfit as they have a wide range of choice. Several members of the C.N.R. squad which took the measure of the Redmen last week are on the team.

McGill will be strengthened by the return of Harkness to his old position at right half but this is compensated for by the absence of Carter on the left wing. His place will be taken by Astwood who has shown up well before.

Kick off at 7:30. Referee A. Hilliam.

The line-up:

McGill	All Stars
Goal	MacLean (C.N.R.)
Ross	R.B.
Harkness	Boyne (C.N.R.)
Reece	L.B.
Minnion	Gaylor (Wes'm't)
Owen	R.H.
Ewen	T. Lone (C.N.R.)
Crabtree	C.H.
Nolan	Heley (W.S.A.)
Mollott	L.H.
Jones	Keffeler (Wes'm't)
Astwood	O.R.
Campbell	Muir (Wes'm't)
sub-Janikun, Smart Dud-	I.R.
er.	G. Curley (W.S.A.)
All-Star subs—J. Lone (C.N.R.), Si-	C.F.
van (Emard), Kennedy (C.P.R.)	T. Curley (W.S.A.)
	I.L.
	H. Lone (C.N.R.)
	O.L.

Badminton Club Is Recognised

A NEW sport was added to the list of the Athletic Board this fall with the formal recognition of the McGill University Badminton Club.

This club has been functioning two years with a constantly increasing membership. It holds tournaments with local clubs.

Players' Club

A rehearsal for the cast of "From Morn to Midnight" will be held this evening at 7:00 P.M. Messrs. Cronyn, Grier, and Place and Misses Carter, Meagher, and Vercoe are requested to be present. At 8:00 P.M., Messrs. Beatts and Phillips and at 9:00 P.M. Misses Carden, Gregory, Loomis and Miller are wanted.

CONSTRUCTION CREW

Will the following students please meet Sid Bunting in the lobby of the Union at 7:30 tonight: Messrs. Reckwood, Rankin, Payan, Beatts, Place and Nobbs.

entering both "A" and "B" teams and intercollegiate competition may be expected in the near future.

In a letter to the Athletic Board last spring the executive of the club stressed the growing importance of badminton in the Dominion, the large number of student players, and its establishment in other universities.

It is expected that this year the fee will be rendered negligible and a much larger membership is expected as a result.

Canadian Museums Flooded By Offers

Depression Brings Opportunity For Purchase

The present depression has presented an extraordinary opportunity for the purchase of museum exhibits according to Mr. E. L. Judah, Curator of the University Museums. Many of the museums in the United States are dependent on public charity. These have had to cease purchasing material on account of lack of funds, so the Canadian museums are being flooded with offers. If money were obtainable it would be possible to purchase material at a great saving as many exhibits are being offered at much below their value. Unfortunately the necessary money is not forthcoming, so purchases must be limited.

A valuable collection of Mexican blankets and baskets has recently been received from Harold Noad of Ottawa. These will be put on exhibit soon.

Phonetics Will Be Introduced In New Course At McGill

(Continued from Page One)
no teacher or student of language can afford to ignore. If good pronunciation habits are to be developed in contrast with those already possessed, pronunciation must be methodologically detached from the other linguistic features, so that the attention is exclusively focussed upon it. Accordingly many universities have included in their curricula special courses in phonetics, while a number of them even possess autonomous phonetic departments.

In Canada, little has yet been done along these lines and McGill is the only university that now offers a systematic series of lectures on the subject, according to Professor Graff. While the topics to be discussed in the proposed lectures will be of especially great interest to the teacher of modern languages, the student of historical periods of language cannot go far without understanding the essential processes and laws of phonation. Moreover, the student of psychology can find an extremely fertile field of research in the unconscious speech behaviour of human beings, and all who are somehow concerned with language or speech will find stimulating information in this field.

Students Society Will Meet Today In Union Ballroom

(Continued from Page One)
annual fee of \$11.00. This sum to be collected by the Bursar with the regular tuition fees and to be collected as follows:—

Athletic Board	\$5.00
M. V. S. A. A.	\$2.00
McGill Daily	\$1.50
Students' Council	\$1.50
Undergraduates' Society	\$1.00

(Signed) A. S. Marshall
(Signed) Gibson E. Craig

Notice of motion is herewith given that at the meeting of the Students' Society, held at the McGill Union on October 21st, 1931, we the undersigned, will move that the Constitution of the Students' Society, Article 7, Section 4, which now reads:—

(a) President of the Students' Society.

(b) Two members elected of the male members of the Society by ballot, shall be amended to read: Athletic Board. The Students' Society shall have three male representatives on the board.

(a) President of the Students' Society.

(b) Two members elected of the male members of the Society by ballot.

Of the two men elected for the session 1932-33, one will hold office for one year and one will hold office for two years and for the following year one man will be elected each year to hold office for two years.

(Signed) Mover
Gibson E. Craig.

(Signed) Second
H. Carl Goldenburg.

That in Article VII, part 4 of the constitution of the McGill University Students' Society, which at present reads:

(4) Athletic Board. The Students' Society shall have three male representatives on the board.

(a) The President of the Students' Council.

(b) Two members elected annually by ballot of the male students of the society.

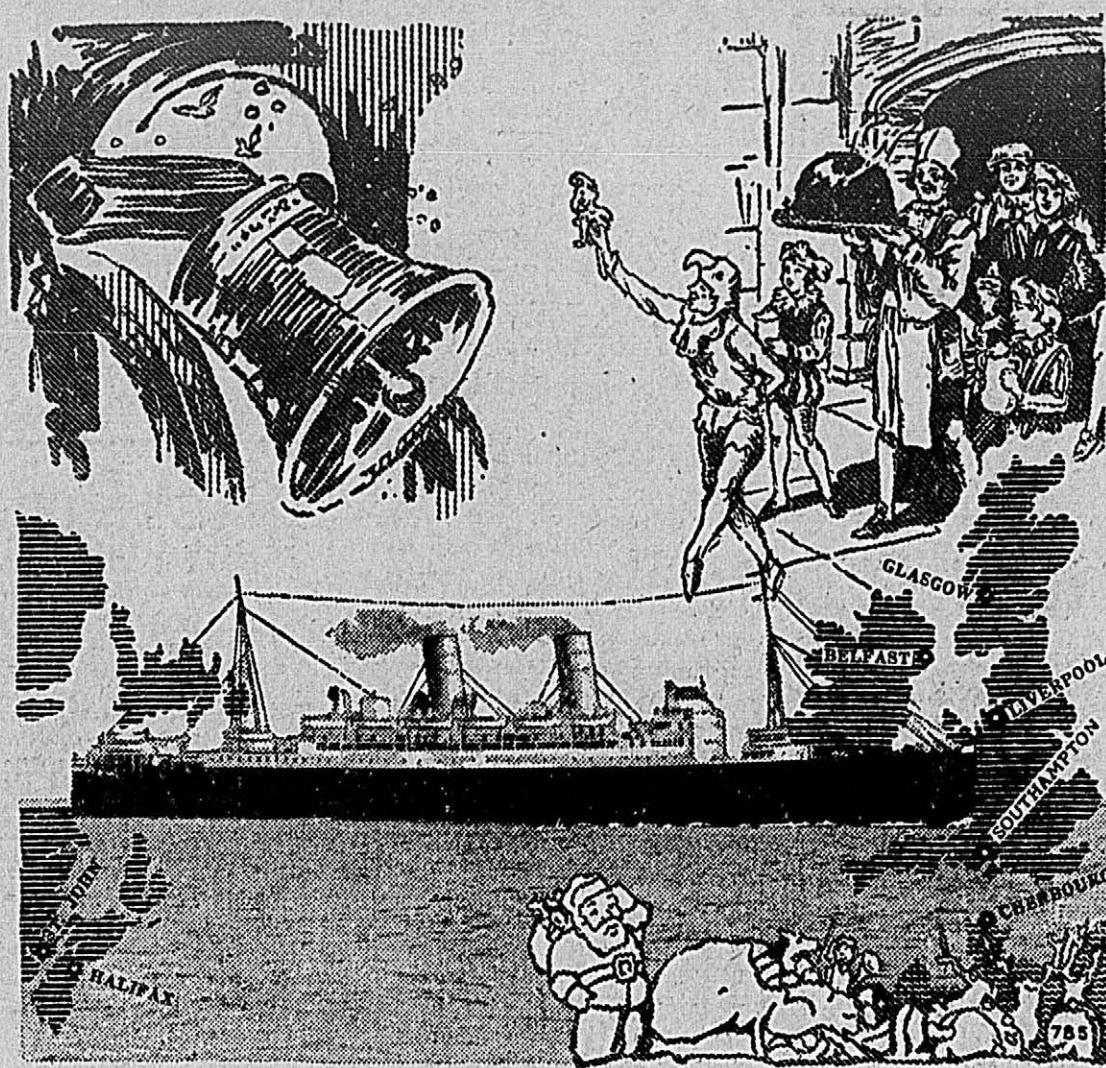

Section A to be amended to read: (a) The President of the Students' Executive Council, or in the event of the President being a woman member of the society a male member of the council nominated by her, or elected by the other members of the council.

Moved Arthur J. Marshall.

Seconded Hubert Doody.

A physician says that jazz musicians are highly strung. And most people agree that they should be.

Christmas At Home

"In half a minute Mrs. Cratchit entered—flushed, but smiling proudly—with the pudding, like a speckled cannon-ball, so hard and firm, blazing in half of half a quarter of ignited brandy, and bedight with Christmas holly stuck into the top."

Not very many words, but in those few words Charles Dickens seems to have gathered together all the reasons why every year Canadians from all over the

Dominion look towards England and the old-fashioned Christmas.

And the ghostly smell of that Christmas pudding, "like an eating-house and a pastrycook's next door to each other, with a laundress's next door to that!", has an influence on steamship passenger officials "as they make up their sailing lists."

This year the Canadian Pacific has arranged four sailings from Saint John, N.B., designed to

allow home-ward bound Canadians to reach even the remotest parts of the British Isles in time for the great English festival. They are the Montclare for Glasgow, Belfast and Liverpool, December fifth, Duchess of Bedford to the same ports December 11th, Montrose to Cherbourg, Southampton and Antwerp December 12th, Duchess of Richmond to Glasgow, Belfast and Liverpool December 16th, for the real last-minute travellers.

Geologist Outlines Coal Situation In Illustrated Lecture

(Continued from Page One)

Fully one-sixth of the world's supply of coal is in Canada, Dr. Moore continued, but the trouble is that it is far removed from the centres of population and industry. An optimistic note was struck, however, when, in conclusion, the speaker stated that it would take about \$8,000 years to use up the coal in Alberta alone.

Future Lectures Planned.

Several lectures have been arranged for the future with a view to obtaining authoritative information on the many-sided coal problems. The lectures have been carefully planned and speakers with a thorough knowledge of their subject engaged. The second lecture of the series will be held on Friday evening at 8:30 in the same place. Edgar Stansfield, research professor on fuels, University of Alberta, will speak on "Chemical Composition and Classification of Canadian Coal."

Noted Scientist Welcomed Home After Long Trip

(Continued from Page One)

spent six weeks at research work in his laboratory, comparing notes on the data which Professor Goerbel collected many years ago, and on which he has written an important work.

Professor Lloyd is interested in a different aspect of the same problem, and though the collection of Australian plants of the Eucalyptarian group which Goerbel gathered were important, he fears that he will not be able to satisfy himself without making a voyage to Australia to study the living plants.

There are about two hundred specimens of this group scattered all over the world, of which Professor Lloyd found several new specimens on his African expedition. Canada, he says, can show but three or four, giving Bladderworts as an example of one.

He passed through Czechoslovakia, stopping at Prague and Brno. In Prague he visited Moravich with whom he collaborated in the writing of a book on periodic precipitation.

Attends Faraday Celebration

He arrived in London for the Faraday celebration and the meeting of the British Association for the Advancement of Science, which was presided over by General Smuts. The association held its centenary meeting, at which over five thousand were present. Professor Lloyd was the official McGill delegate to the association.

Unique Experiments in Embryonic Development Described By Spemann

By Exchange Service.

Producing two-headed monsters, lites and twins from single animal eggs were some of the strange and fascinating experiments in embryology which were described by Prof. Hans Spemann in his lecture on "Experimental Work on the Theory of Development" given in Stinson Hall yesterday afternoon.

"It is impossible either to alter or produce artificially in man such phenomena as can be experimentally brought about in animal embryos," said Professor Spemann. The speaker went on to describe how eggs can be constructed causing an

Flaming Females Favour Fashion's Fad But If It Rips It's Going To Be Too Bad

Pyjamas used to be referred to as sleeping garments of some description. In fact, it wasn't proper to refer to them at all.

Pyjamas aren't what they used to be. The good old-fashioned flannellette variety, with the staunch, red flannels has disappeared, to be replaced by more filmy, more fantastic, and more ample types, worn not only (if at all) in the bed, but even sported (so we hear) on the University campus.

As to the authenticity of this report, there may be some doubt, but as to the student opinion concerning it, there is no doubt whatever. Keeping in mind (perhaps being unable to forget) the unusual, sometimes even uncomfortable temperature bestowed on us by the weatherman, most of the co-eds are highly in favour of adopting the fad for campus use, at least temporarily. Some have improved on the idea and sigh, oh, for shorts!

A very few, a remnant of the fine, old Victorian stock, scorn the notion without waste of words. They seem to retain some doubts as to the facility of covering the space between U.C. and Domestic Science building in ten minutes! Others fear the stairs. There is the suggestion, however, of using the idea to replace the traditional freshette berets—striped pyjamas, checkered pyjamas, red, green, yellow pyjamas—quite a startling and colourful effect on the campus!

After all, why shouldn't the whole of Varsity don them? Light, airy ones for summer. Tweed for late autumn. Fur-lined for winter. A variety of flowery styles for afternoon wear. They could be quite easily tucked into ski boots to give a sporty effect on the snow, and into hockey socks for the rink. What a sight! The students in classes with their college colours displayed vividly around the waist, over gay coloured pyjamas. The faculty in like garb with the distinction of hoods or gowns to give added effect. Any other suggestion will be most gratefully received! Cheers for the brave girl who dared to introduce such a fad!

Debating Union To Start Activities

(Continued from Page One)
of the Championship Inter University Debating team, is a colleague of Ken Baker, Albert Mayrand, B.A., a law student of the University of Montreal, will also uphold the affirmative side.

Edmond Collard represents McGill on the negative side. For the past few years he has been secretary of the Debating Union and is well-known in debating circles. David Anderson, winner of the Bovey Shield, and President of the Freshman-Sophomore Debating Club completes McGill's contributions to the teams. Guy Legault, of the University of Montreal is also speaking on the negative side.

Both U. of M. students will speak in French. The discussion, which is to be held following the debate, will be formally opened by Maurice Gagnon, who will also speak in French.

All participants are experienced, and an interesting evening is anticipated. A cordial invitation is extended to R.V.C. students and anyone who is at all interested in debating. In these days of far-famed depression, it may be good news to some to hear that the debate is free, gratis, and for nothing.

Residents Demand Ban on Petting in Parks.—Head-line. Is public sentiment against public sentiment?

NOTICES

Notices must be legibly written on one side of the paper only. They must be handed in to the Daily office before eight o'clock on the night previous to publication. For sale notices not accepted.
